OPERATE OVERVIEW - TASK RESPONSES

The following describes the functionality and features included in SQM.

Objective

The objective of this page in SQM is to provide the individuals with the ultimate and operational responsibility for the firm's system of quality management, with an overview of the responses to tasks that have been completed within SQM.

The knowledge gained from monitoring these responses can either lead to following up on responses or it could highlight further effort required in improving the firm's system of quality management, if it indicates that some policy or procedure responses are not operating optimally, or if additional quality risks are identified.

Page position

TASK RESPONSES can be found in the OPERATE OVERVIEW module.

Page content

This page includes a dropdown menu from where the individuals with ultimate and operational responsibility can monitor completion of tasks.

A table, showing the completed records, will be shown for the selected task.

1. Users that require access

Users that should have access to this module include

- The individual(s) with ultimate responsibility and accountability for the firm's system of quality management (the UR);
- The individual(s) with operational responsibility for the firm's system of quality management (OR);
- The individual(s) with operational responsibility for independence in the firm's system of quality management (IND); and
- The individual(s) with operational responsibility for the firm's monitoring and remediation process (MON).

2. Select a task

Select the relevant task from the dropdown menu.

Page Outcomes

After reviewing the task responses in this page, users with ultimate and operational responsibility for the firm's system of quality management will be aware of the responses provided in completing tasks on SQM and they will respond to these completed tasks appropriately.

Features

The following features are available on this page:

- Working with tables, which includes filter, sort, group, column chooser, expand, see page XXX; and
- Export all data, see page XXX.
